## About us

**Skin Blossom is a UK skin care company who make safe, affordable & effective organic skin & hair care, because everyone is entitled to healthy, beautiful skin.**

At Skin Blossom we believe that everyone deserves beautiful, healthy skin and hair. That's why we create effective natural products using the finest organic ingredients, without the high price tag. Certified organic skin care at its best, and available at a price that everyone can afford. Affordable organic quality.

Skin Blossom was created in 2007 by Cris Beetham who was concerned about using products that contained the chemical ingredients found in conventional skincare. After many years as an organic skin care advocate Cris was concerned about the high price of natural beauty products, so decided to create her own range that everyone could afford. The brand launched with just one product, our organic caring hand cream, but following popular demand the range has grown to now offer everything you need for your organic skin care requirements and an organic hair care regime.

Our award winning Skin Blossom organic skin and hair care range is made in the UK has been specially created to contain organic and skin-friendly ingredients. All products are certified by the Soil Association, who are the UK's organic skin care assessor. There are no clear general rules and regulations around organic skin care in the UK, and the Soil Association accreditation is something we undertake voluntarily. We choose organic certification so there is no quibble about the safety of our products. You can find out more about the Soil Association at [www.soilassociation.org](http://www.soilassociation.org) The Soil Association have very strict health and beauty standards and carefully check the ingredients in our organic UK skin care. They guarantee the organic integrity of our ingredients and also assess that they are not harmful to health and have minimal environmental impact during manufacture. At Skin Blossom we are proud to make gorgeous, effective and credible organic skin and hair care.

As nature lovers we never use animal ingredients or involve them in our production. Our products are not tested on animals and we only purchase ingredients from suppliers that also never test on animals. All of our organic skin and hair care is Vegan and registered with the Vegan Society. So as well as our natural beauty range being kind to skin, it is also kind to the environment. You can find out more about vegan product standards at [www.vegansociety.com](http://www.vegansociety.com)

As well as huge benefits for wildlife, organic ingredients contain more nutrients and less pesticide residues than intensively farmed ingredients. The ingredients in our organic skin and hair care products that are not organic are those essential to make the product, such as plant derived emulsifiers. Our products are packed with organic ingredients 98.85% natural & free from harsh ingredients like SLS, SLES, ALS, Phylates, Parabens, Phenoxyethanol, DMDM, PEGS, Silicones, synthetic colour & fragrance, Petrochemicals, Urea, DEA, MEA, TEA, GLYCOLS and GM ingredients.

# Skin Blossom

## Best Value Organic Beauty Range Award

We are delighted to announce that the Skin Blossom organic range has won the Best Value Range highly commended category in the Natural Health magazine awards. Natural Health Magazine thoroughly tested thousands of the very best natural and organic beauty products around before deciding the winners. So this is a true accolade to the quality and value of our organic skin and hair care. It is absolutely what Skin Blossom are trying to achieve, to be the best possible value for gorgeous highly effective organic skin and hair care, and that is why we make all of our products so affordable. We do our best to make natural healthy beauty products available to everyone, whatever their budget. Thanks so much to Natural Health magazine for recognising this!
